Short bio

George Z. Zachos is a Master of Engineering student at the *Department of Computer Science & Engineering, University of Ioannina*. He has served as a member of the *Computer Systems Support Group* of the Department for 2.5 years and received an achievement award for his work (November 2016). He is a member of the Excellence Units of the *Greek Free and Open Source Software Society* and in November 2015, was awarded twice for his contributions to open source projects. He is a member of the *IEEE Student Branch, University of Ioannina* and has been a speaker in seminars covering various Linux-related topics. His research interests lie in the area of parallel & distributed computing. He is a member of the *Parallel Processing Group (PPG), University of Ioannina* since 2015 where he works on shared and distributed memory systems and their programming models. He is also actively involved with the development of OMPi, an open source OpenMP compiler and runtime system for C developed by the same group. He has participated in the *Partnership for Advanced Computing in Europe 5th implementation phase project (PRACE-5IP)* as a parallel programming instructor at the PRACE Training Centre established by the *Greek Research & Technology Network*.
